Ibstone cabinet and saddle stool

True to our founder's vision, while moving with the times. Always in tune with changing needs and desires. Classic design and traditional craftsmanship, for the way we live now.

Lucian Ercolani, my great-grandfather, founded ercol in 1920. Edward Tadros, my father, has been our Chairman for the last 29 years. I am now immensely proud to be the fourth generation of our family taking over the role of Chairman as we embark on our second century. We remain true to Lucian Ercolani's fundamental principles of design, craftsmanship, innovation, and excellence.

I strongly believe that at the heart of everything we do are our people and our factory; a modern, highly sustainable facility in Buckinghamshire. Here, the latest high-tech machinery sits alongside age-old traditional skills and methods used by our craftspeople, many have worked with us for over 21 years, passing on their skills and knowledge to our young apprentices. To ensure the breadth of choice for you, our customers, we also work closely with trusted manufacturing partners, in the UK and elsewhere in the world.

Our furniture is created by our brilliant Design team, and from time to time in collaboration with exciting emerging British design talent. Behind every piece is the same clear intention: to bring unique and lasting beauty, comfort and practicality to every room in your home.

Henry Tadros, Chairman.

This is your home. Where everything is just as you want it. Comfortable. Familiar. Personal. Like nowhere else, and the place you love best in the world.

Our company was founded by Lucian R Ercolani, whose vision and approach to design still exert enormous influence as we embark on our second century.

Born in 1888 in Tuscany, Lucian, the son of a picture-frame maker, came to London as a child, and studied drawing, design and furniture-making at night-school in Shoreditch. As a young man, he moved to High Wycombe, then the 'furniture capital of England', where he worked alongside some of the era's leading designers and manufacturers, before branching out on his own in 1920.

Lucian was a pioneering designer, and placed design at the heart of everything he did and produced. In the early 1950s, he launched a range of affordable, honest and functional furniture with beautiful, distinctive outlines and subtle details that would become a household name. But he was equally committed to people and the traditional skills of hand craftsmanship – values we still uphold today.

Lucian believed that when he founded the company, he was also establishing a dynasty. That vision has been realised through his sons and grandson, Edward Tadros, who retired as chairman having worked within the business for 49 years. Sharing his grandfather's passion for design and manufacturing processes, Edward was instrumental in developing and building our award-winning factory in Princes Risborough.

In 2022 Edward stepped down as chairman, to be succeeded by his son, and Lucian's great-grandson, Henry. The company is now one of only a handful of large firms to remain fully owned and managed by the fourth generation of the founder's family. And, in addition, ercol has won numerous awards and delighted customers across the world, we believe this achievement would make Lucian proudest of all.

# Monza

Monza's lightness and flexibility make it ideal for any room in your home. Herringbone designs blend with brushed grain oak and black-finished turned legs and rails to create a thoroughly contemporary feel, while echoing ercol classics of the past.

# Windsor

Windsor has been in continuous production since its creation by our founder, Lucian Ercolani, in the 1950s. A genuine design classic, made in solid ash, its simple, elegant outlines and signature handles remain as fresh and appealing as ever.

## Romana

Romana's smooth, organic lines and deceptively understated design belie a wealth of complexity. Recalling our designs of the mid 20th century, it's crafted in light oak, with sculpted curves, flush surfaces and soft-close drawers and doors.

Our overarching commitment to craftsmanship and a considered approach to materials defines the coming seasons.

Our dedication to harnessing our key skills and reworking our heritage collective allows us to immerse ourselves and draw from our provenance; celebrating and reimagining our core designs. This direction draws parallels with the trends that we have aligned ourselves with this season; *Intuition*, *Abundance* and *Embody*.

*Intuition* reflects a journey navigating through changing landscapes. A new narrative emerges, drawn from allowing time to observe through contemplation. Deep inky blues and berries contrast with plumage greens. Honouring traditional craft techniques, handmaking and accessories steeped in tradition. To reflect this, the ercol fabric collection has been refreshed with jewel coloured fine needle cord and sumptuous chenille fabrics. And sees the addition of Maroon and Teal wood stains in the same tone to create immersive colour.

*Abundance* draws inspiration from natural resources. The foundations of colour, deconstructing the origin of pigments in nature to celebrate the beauty of our rich, natural habitat. Tones are derived from earth pigments - iron ore, red ochre, clay and sandalwood. These mineral hues are naturally grounding and connecting, balanced with a harmonious natural palette of mossy and leafy toned greens.

We find ourselves surrounded and immersed in technology, and *Embody* is the antithesis of this. To be mindful, breathe, be in the moment and just enjoy your surroundings. Our homes occupy a place of sanctuary; to nurture and to contemplate. The colours of *Embody* embrace stillness, and the tones reflect a calm environment. Soft nurturing pinks and contemplative shades of sage, layered with natural materials and finishes. From soft textured fabrics to light timbers and stains, soft curved forms dominate the look for this trend.

'Homes are our sanctuary, we can be playful and embrace joy, our collection is curated to embrace these values.'

Rachel Galbraith, ercol Creative Director.

In parallel, and to reflect these trends, we have added upholstered seating into our dining collections. Windsor, Heritage and Lugo are the most wonderful canvas to share our palette of fabrics and timber stains, and work perfectly with our range of dining tables.

Sofas and chairs have been revitalised with new fabrics and leathers, with leather being added to all our pieces in the Edit Collection. Textured weaves and vintage velvets complement.

Our homes are a refuge from the outside world, where we look to for comfort, joy and personality. Our collections embrace these values.

You can experience our furniture in our showroom at Princes Risborough, where we display a wide collection of our ranges, designed with your home in mind.

Through our landmark partnership with Grown in Britain (GiB) we're helping to strengthen our own homegrown timber supply chain, and contributing to a renaissance in sustainable woodland management.

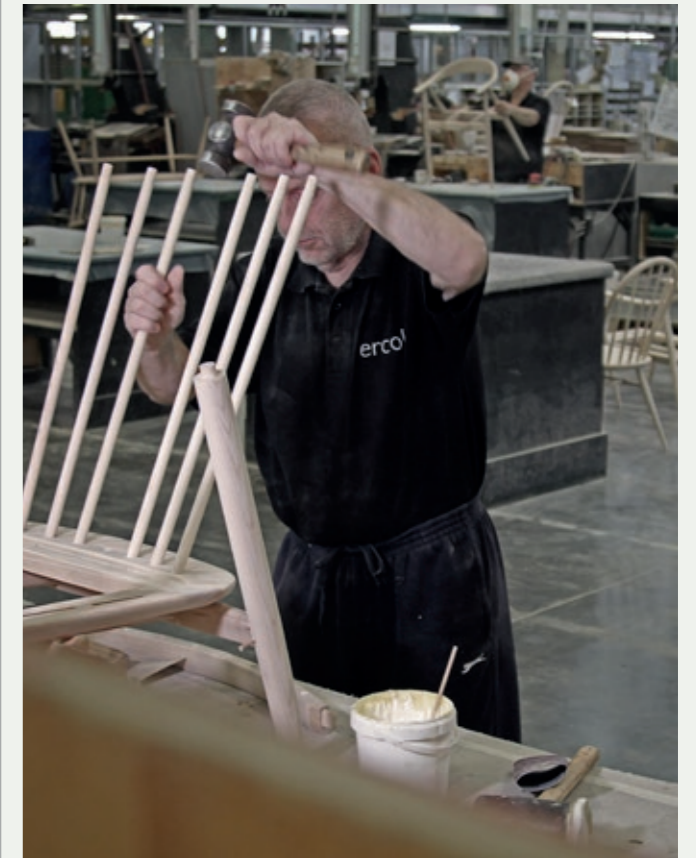

Top image: Grain detail on our Marino chair. Middle: A managed forest allowing for trees to grow tall and straight. Below: Wood tagged and ready for delivery to our factory.

For decades, there have been concerns in Britain around homegrown timber supplies, particularly of hardwoods. In 1944, our founder Lucian Ercolani's first major contract was to make 100,000 Windsor chairs for the Utility Furniture scheme, which had been introduced to cope with wartime shortages and rationing of raw materials.

Eighty years later, Britain remains the world's second-largest net importer of timber products after China, with over £8 billion-worth of wood products shipped in every year. It's not that we don't have woodlands here, of course: forests occupy around 13% of the UK's land area, and over 14,000 hectares (around 35,000 acres) of new woodlands were added in 2020/21 alone. The problem is that large swathes of these woods are under-managed. As well as being far less productive overall than they used to be, they no longer produce wood of the right quality in sufficient quantities for furniture-making – in fact, over 85% of locally-sourced hardwood is simply burnt as fuel.

Top image: Hand assembling a Marino chair in our factory. Below: Each piece of furniture is laser etched with the Grown in Britain mark, along with our logo.

Grown in Britain (GiB) was founded 10 years ago to strengthen the domestic supply chain and reduce dependence on imports through improved forest practices. This is a mission close to our own hearts, so we're delighted to be the first UK furniture maker to work with GiB to make products from homegrown timber at scale.

Through the partnership, we're now offering a small range of classic ercol designs manufactured exclusively in British ash. They've been carefully chosen based on known timber volumes so we can ensure consistent production and quality. We're starting with the Marino chair and sofa, and our Pebble nest and coffee tables: as the supply of homegrown timber increases, we'll look to expand the range to include more items and styles.

Being able to source more of our raw materials from within the UK is an important part of our own sustainability journey. More broadly, using timber to make a piece of furniture means the carbon dioxide captured in the living tree is 'locked away' for its entire lifetime and beyond.

Our new GiB range is also encouraging investment along our entire supply chain, helping to demonstrate that working with sustainable British timber is both commercially viable and environmentally responsible. It's a small but important step and we're looking forward to continuing the journey in future.

Leave the world outside. Surround yourself with quiet and comfort. Rest your body, soothe your mind. Rest. Sleep. Greet the day refreshed. Your space. Your time.

# Information Guide

In the following pages, you'll find product specifications including wood finishes, dimensions and any other important information relevant to your chosen collection.

## Wood finishes and colours

We work with solid ash, oak and tulipwood, and some wood veneers and composites where technically required, each carefully purchased from responsibly harvested sources complying with UK Timber regulations. We prioritise wood from sustainably managed sources where possible, and conduct periodic testing across our supply chains to ensure materials are of declared origin and species.

We now have a collection of five pieces made using British certified ash as part of our partnership with Grown in Britain (GiB).

Our furniture is finished with a wood stain, the options for which are shown right and on relevant product specification pages, before a coat of lacquer is applied to protect the furniture. Please note that our Clear Matt (CM) finish seals and protects the furniture. As a result, it does not blend or conceal any of the natural variations within the timber. It will show the wood colour and grain off to its full, natural beauty.

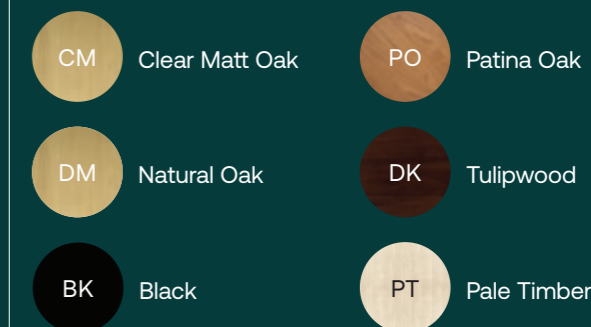

Timbers can also vary from range to range. To see the exact colour and finish of the wood, order a sample by visiting [ercol.com](http://ercol.com).

For safety reasons, all cabinets over 60cm in height should be secured to a wall to ensure stability. For this reason furniture will have holes or fixings on the back.

## Fabric ranges

We have a wide range of fabrics and leathers for selected ranges. Fabrics to suit the furniture designs have been carefully selected and the names of the fabric collections are shown on the specification pages - ercol, Edit, Natura, Paloma and Dining. To view these on the furniture visit [ercol.com](http://ercol.com)

Sofas are measured to maximum dimensions, but due to the manufacturing process, these can vary slightly. Scatter cushions supplied are as per images shown on pages 84 -95.

We offer a re-cover service on some show wood frame ranges. You can order genuine ercol replacement cushions to extend the life of your furniture. The ranges available for this service are listed in our ReCover guide or at [ercol.com/recover](http://ercol.com/recover)

# Mattresses

## A great night's sleep for everyone

Working in partnership with British mattress-maker Harrison Spinks, we've designed and produced a range of four mattresses - the Wooton, Ledwell, Culworth and Bainton - to meet different customer requirements and price points. They're all handmade in the UK using wonderful natural materials including wool, hemp, Egyptian cotton, mohair and even cashmere. But they also include the pioneering Cortec spring system that, as well as providing incredible comfort and support, are 100% recyclable and glue-free. The mattress covers, which are handwoven in the UK using state-of-the-art machines, are breathable for comfort and free of fire retardant chemicals. Taken together, this all means our mattresses are zero-to-landfill at the end of their (long) lives. Compared to many mattresses, they're much better for your health and sleep patterns, and have vastly less impact on the environment.

# Monza

The Monza bedroom range is a contemporary update of classic, mid-century design, with a textured patina finish. # Winslow

The shape and design of the ercol Winslow bedroom collection was inspired by an ercol dressing table, first designed in 1956 by Lucian Ercolani, ercol's founder. The design has been reinterpreted and the collection focuses on this heritage to create a range that has elegant tapering legs, oak spindles and plenty of storage. Made of matt lacquered oak, the Winslow range is elegantly timeless.
