Wall fixing instructions

Thank you for purchasing this ercol product.

Please read the instructions carefully before use to ensure safe and satisfactory operation of this product.

Installation shall be carried out exactly according to the manufacturer's instructions, otherwise a safety risk can occur if incorrectly installed.

WARNING: In order to prevent overturning this product must be used with the wall attachment device provided.

1. Place your product in the final position. Loosen the screws on the metal brackets just enough so that the slotted bracket can be extended to meet the wall.
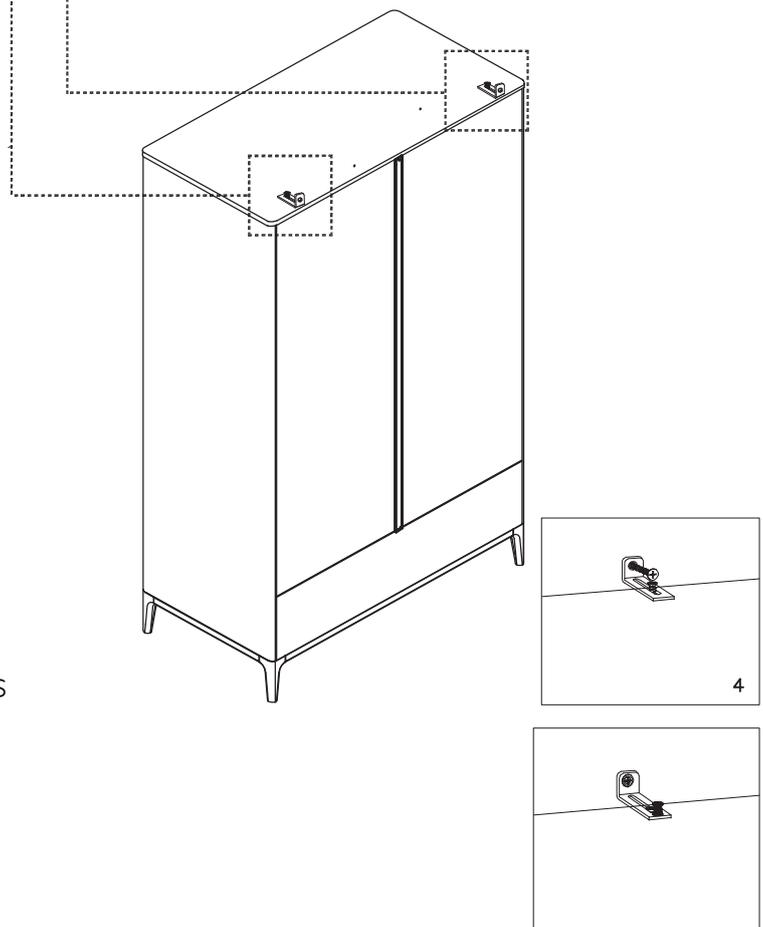

2. Then re-secure the screws.

3. Mark the wall for drilling through the hole in the short face of the bracket.
Then remove the unit from the wall so that the marked holes can be drilled.
Ensure you use an appropriate fixing type for your wall (see page 7). Then return the unit to position.

4. Secure the unit to the wall fixings with own screws through the brackets and secure the 2*16mm screws on the top of wardrobe.

Warning
Serious or fatal crushing injuries can occur from furniture tipping over.
To prevent this furniture tipping over it must be permanently fixed to the wall.

Wall attached item only.
A guide to wall mounting and fixings

Warning
Serious or fatal crushing injuries can occur from furniture tipping over.
To prevent this furniture from tipping over it must be permanantly fixed to the wall.

Wall fixing screws are not included, since different wall materials require different types of screws / fixings.
Please ensure you use the correct screws / fixings for your type of walls and seek professional advice if you
are not sure.

Failure of the product due to incorrect fixings is the responsibility of the installer.

Important: When drilling into the walls always check that there are no hidden wires or pipes etc.

Types of walls

You can use one of the following types of wall plug if your walls are made of
brick, breezeblock, concrete, stone or wood.
1. General Purpose wall plug
Generally aerated blocks should not be used to support heavy loads, use a
specialist fitting in this case. For light loads, general - purpose wall plugs can
be used.
2. Plasterboard wall plug
For use when attaching light loads on to plasterboard partitions.
3. Cavity Fixing wall plug
For use with plasterboard partitions or hollow wooden doors.
4. Cavity Fixing - Heavy Duty wall plug
For use when fitting or supporting heavy loads such as shelving, wall
cabinets and coat racks.
5. Hammer Fixing wall plug
For use with walls stuck with plasterboard. The hammer fixing allows it to
be fixed to the wall rather than the plasterboard. Always check the fixing is
secure to the retaining wall.
6. Shield Anchor wall plug - Heavy loads
For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes
etc.
Safety: Periodically check all fittings and wall fixings to ensure they
have not come loose and retighten as necessary.

7. Check that the doors are aligned correctly. If necessary adjust the door hinges as shown below .
